Pinter BrewPack

Brewing Schedule

Updated October 24, 2026, 1:53 PM CDT. Unofficial and approximate: check Pinter for current guidance.

Total days is recommended brewing plus conditioning. The optional 1-day cold crash counts toward conditioning and adds no time. Condition at 35 to 40 F; going longer than recommended often improves carbonation and flavor. Minimum is the shortest brewing and conditioning time Pinter lists.
